

Sunnatov Mirmaxamat

Python Developer

Tashkent, Uzbekistan | +998 (94) 896-26-60 | mirmakhamat@gmail.com | Telegram: @mirmaxamat

Professional Summary

Backend Developer and AI Engineer focused on building fast, scalable, and reliable server-side applications. Expertise in designing backend architectures with FastAPI and Django, managing databases, and containerizing applications with Docker. Experienced integrating AI models (OpenAI, Claude, Gemini) into production systems.

Work Experience

Backend Developer

Bismuth Platform — Tashkent | Nov 2025 — Present

- Developed and maintained backend applications using Python and FastAPI
- Designed and developed REST APIs and microservice-based architectures
- Integrated external APIs and internal services
- Worked with PostgreSQL, Redis, and SQLAlchemy
- Containerized applications using Docker and Docker Compose
- Configured CI/CD pipelines and deployment automation

Backend Developer

Freelance | Jan 2024 — Present

- Developed backend solutions based on client requirements
- Built REST APIs with FastAPI and Django REST Framework
- Integrated third-party services: payment systems, Telegram Bot API, SMS, AI APIs
- Designed PostgreSQL and MongoDB database schemas
- Developed Telegram bots, CRM and ERP modules
- Deployed applications to VPS servers using Docker and Nginx

IT Mentor

UNITECH GROUP BUSINESS — Tashkent | Jan 2025 — Sep 2025

- Taught computer literacy and Python fundamentals
- Conducted practical lessons and one-on-one mentoring sessions
- Reviewed assignments and helped students build first Python projects

Backend Developer

GTROBOTPRO — Tashkent | Jan 2024 — Jul 2024

- Developed REST APIs for communication between internal services
- Integrated Click and YooKassa payment systems
- Developed Telegram bots for business process automation
- Worked with PostgreSQL and designed database structures

Education

Bachelor's Degree — Economics, Econometrics

The National University of Uzbekistan, 2026

Python Backend — UIC Group

2023
